

SAGE2™

Birds of a Feather Meeting  
2016

# Laboratory for Advanced Visualization & Applications

University of Hawai'i at Mānoa

Jason Leigh, Dylan Kobayashi

# Electronic Visualization Laboratory

University of Illinois at Chicago

Maxine Brown, Luc Renambot, Lance Long,

Arthur Nishimoto, Krishna Bharadwaj,

Jillian Aurisano, Andrew Burks

# Funding

- Began with NSF ITR (OptIPuter) grant in 2002.
- Supported with NSF STCI grant 2009-2013.
- New support with NSF SI2-SSI grant 2013-2018.
- Academy for Creative Media, University of Hawaii system

# What is SAGE2?

## Scalable Amplified Group Environment

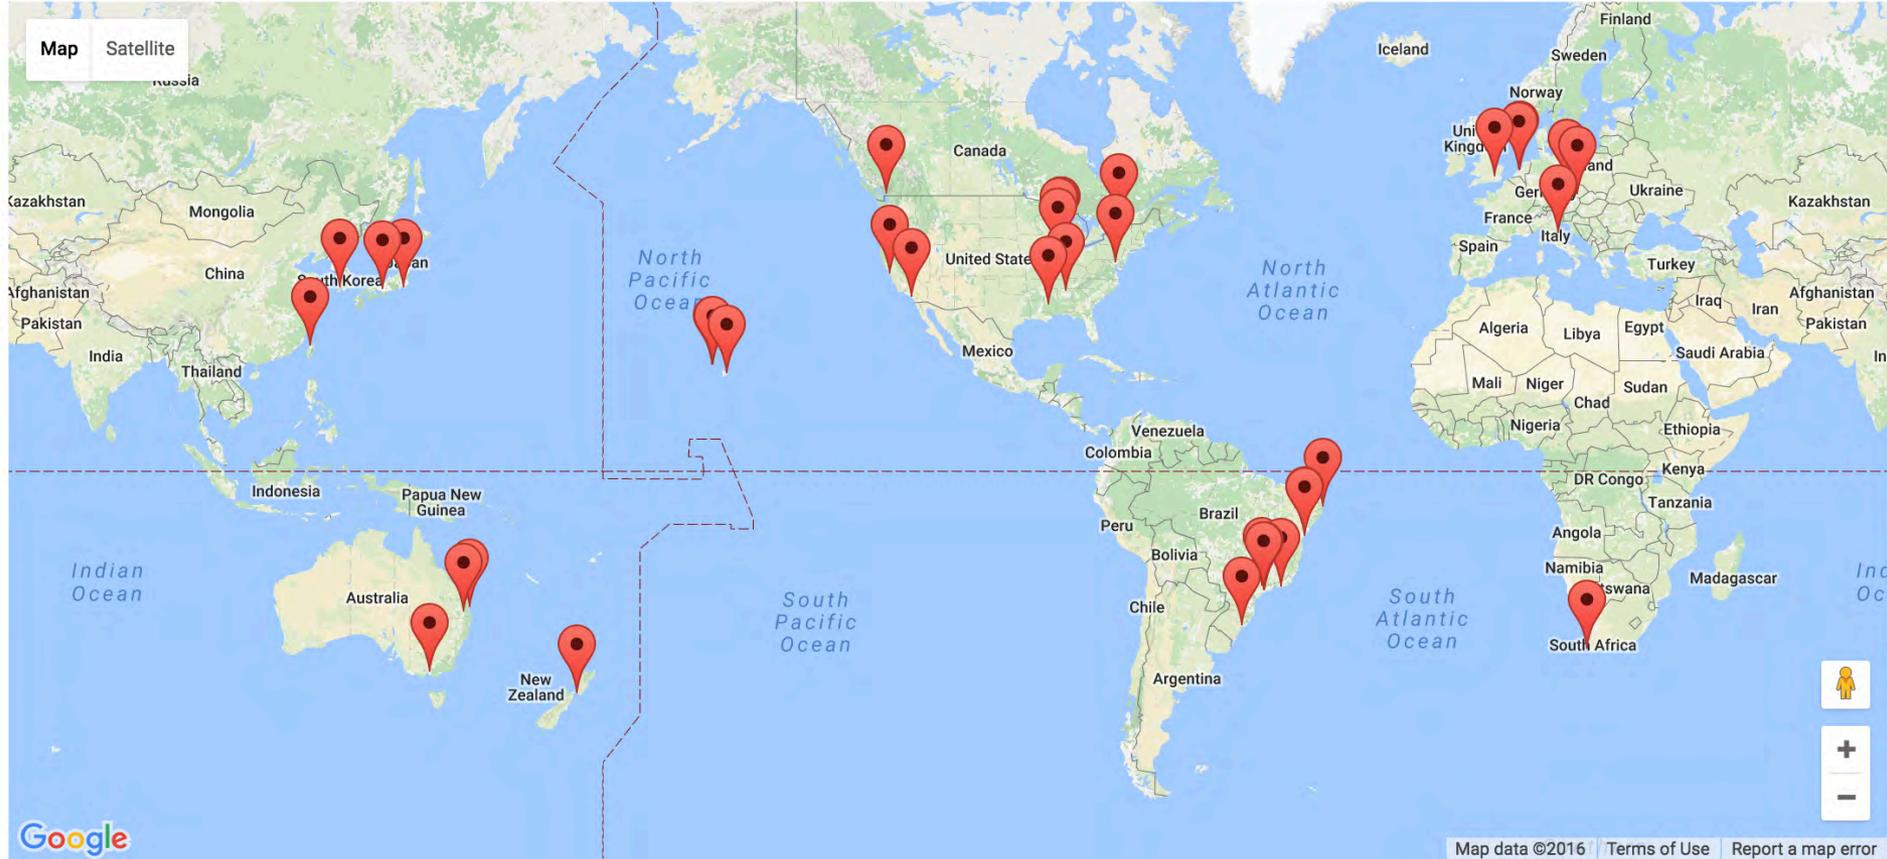

- Middleware to access, display, and share high-resolution digital media on one or more scalable resolution tiled-display walls
- Uses web technologies (rewrite of SAGE: Scalable Adaptive Graphics Environment)
- Push laptop screens or digital media onto a wall
- Multi-user interaction

# SAGE2 User Community 2016

67 Sites: 35 International + 32 National

# SAGE2 User Community 2016

67 Sites: 35 International + 32 National

## AUSTRALIA

- RMIT, (VX)Lab
- University of the Sunshine Coast (3)
- University Southern Queensland

## BRAZIL

- Bahia School Medicine & Public Health
- Catholic University of Salvador (UCSal)
- Federal University Paraíba, LAViD
- Federal Univ. of Rio Grande do Sul, PRAV
- Mackenzie University, LabCine
- National Institute of Space Research
- RNP, Rio de Janeiro (2)
- University of Campinas, Cinema
- University of Sao Paulo, LARC

# SAGE2 Global Community 2015-16

- [sagecommons.org](http://sagecommons.org)
- ~ 4,000 page views per month
- 7,000 users
- USA, Russia, Brazil, China, Australia, Japan, Canada, Czech, ...

Country	Sessions	Sessions
	13,225 % of Total: 100.00% (13,225)	13,225 % of Total: 100.00% (13,225)
1. United States	4,018	30.38%
2. Brazil	1,724	13.04%
3. Russia	1,600	12.10%
4. China	1,016	7.68%
5. Australia	773	5.84%
6. Japan	662	5.01%
7. Canada	464	3.51%
8. Czech Republic	423	3.20%
9. France	202	1.53%
10. Netherlands	200	1.51%

# SAGE2 User Community 2016

- From November 2015
  - **v1.0.0-Koolau: 1,949 binary downloads**
  - Not counting sources download
- 36 registered developers
  - <https://bitbucket.org/sage2/sage2>
  - + 12 outside ‘followers’
- 238 forum members
  - <https://groups.google.com/forum/#!forum/sage2>
  - ~ 50 posts per month (up to 120 last September)

# Use Cases

# Distributed Data Visualization Class

- Class between 'Imiloa Astronomy Center at University of Hawai'i at Hilo and LAVA at University of Hawai'i at Mānoa
- Faculty from Marine Science, Computer Science, and Art and Creative Media

# Kamehameha School: Native Hawaiian pre-college school

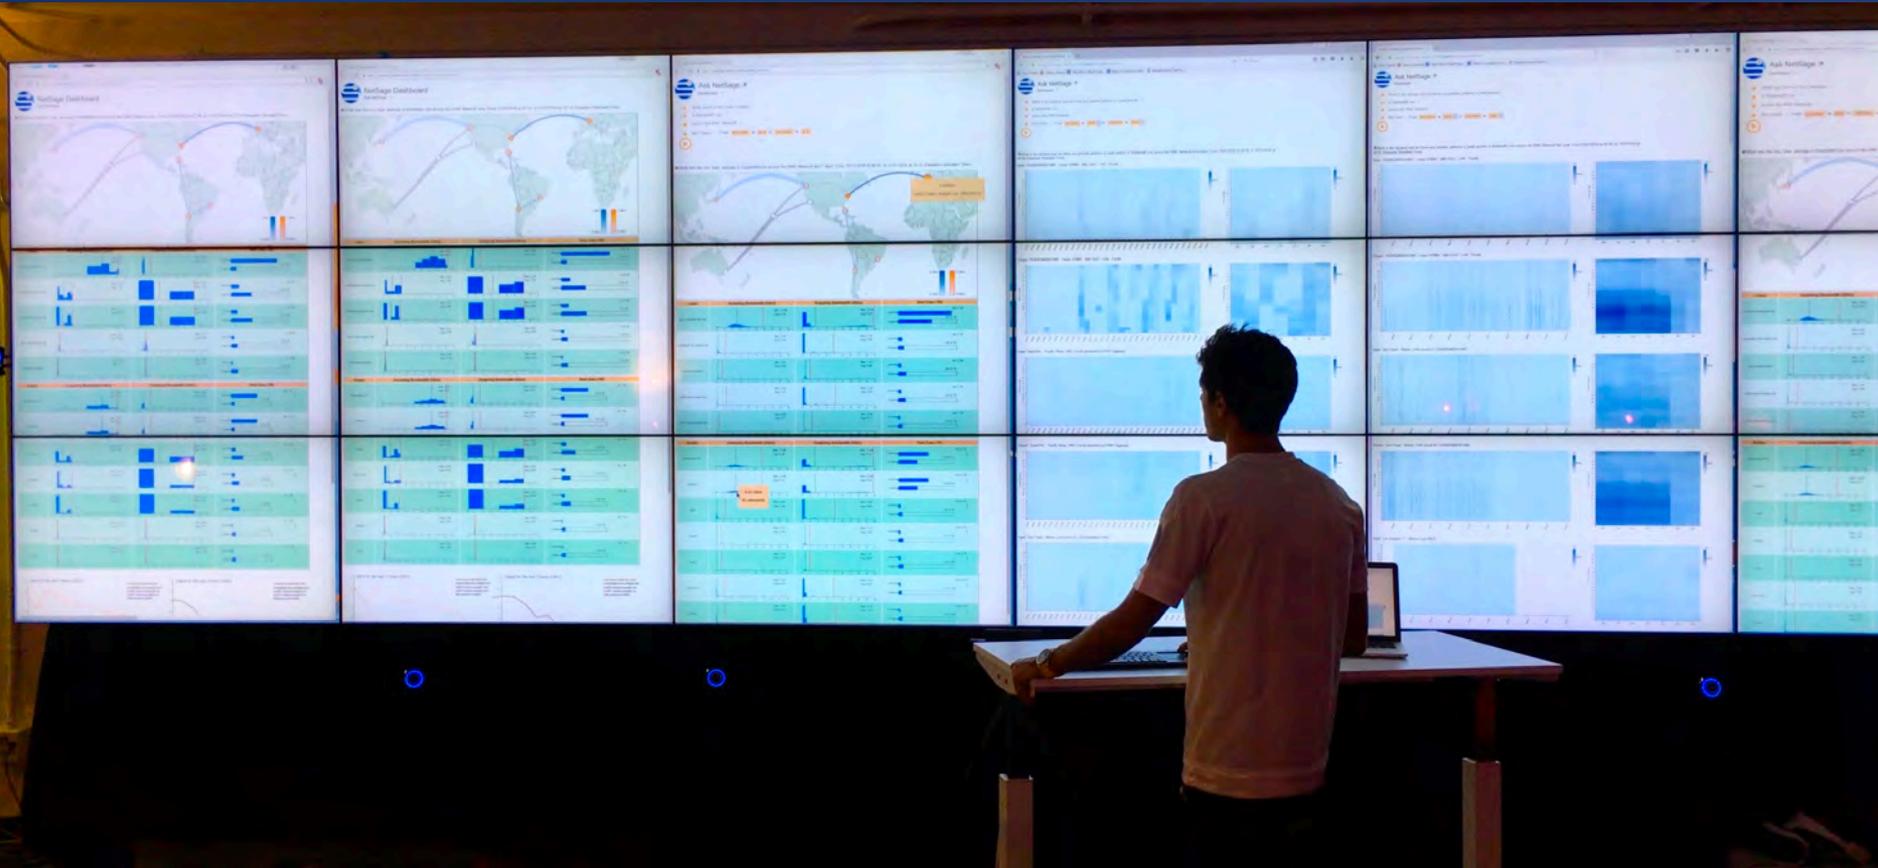

# NASA-funded SIMPLE Project

## Sub-ice Investigation of Marine and Planetary-analog Ecosystems

SIMPLE is a collaboration of Georgia Tech, University of Illinois at Chicago, Louisiana State University, University of Texas, Stone Aerospace, Moss Landing Marine Laboratory and the University of Nebraska, Lincoln. <http://schmidt.eas.gatech.edu/simple/>

# NetSage

<http://www.netsage.global>

<https://youtu.be/Bip-5t-KSLU>

SAGE BOF 2016

[www.sagecommons.org](http://www.sagecommons.org)

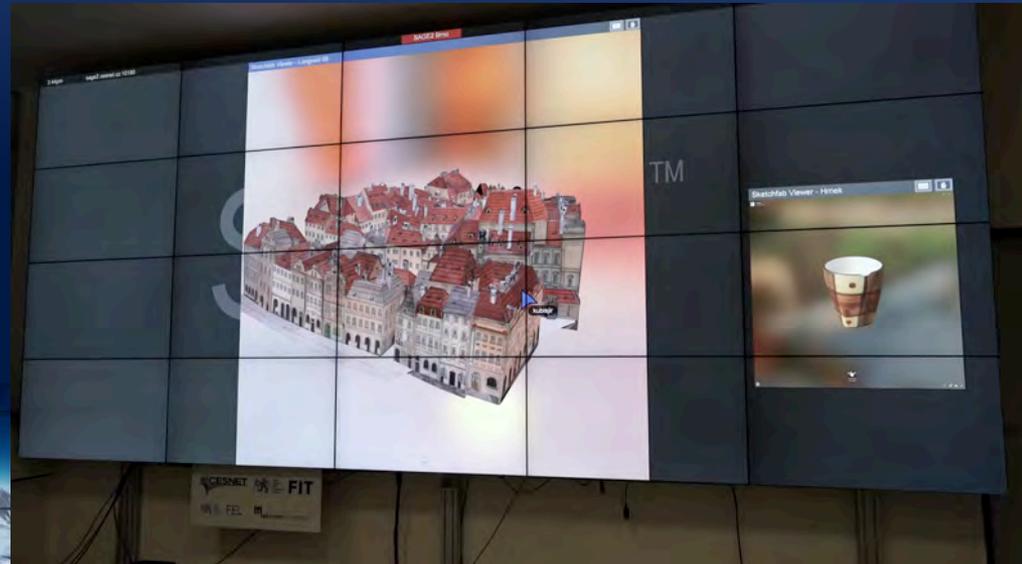

# CESNET

## Sketchfab Model Viewer and Gigapixel Viewer

Jiri Kubista  
Sven Ubik

Sketchfab Viewer

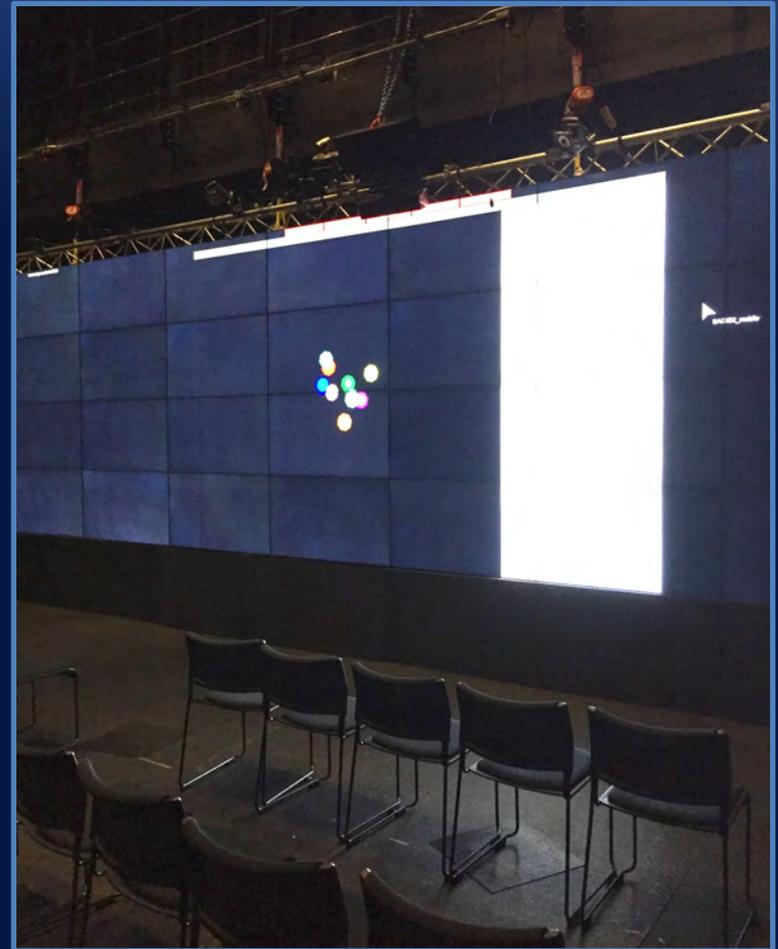

Deep Viewer + Leap Motion Controller

# Emperor at UCSD/Calit2

## Yoshiki Vazquez-Baeza

- Emperor is an interactive tool for the analysis, visualization and understanding of high throughput microbial ecology datasets.
- With SAGE2 we can collaboratively interrogate, and interact with the complexity characteristic of modern microbiome studies.
- Emperor used to visualize beta-diversity plots that succinctly summarize the community structure present in samples collected for microbiome studies.

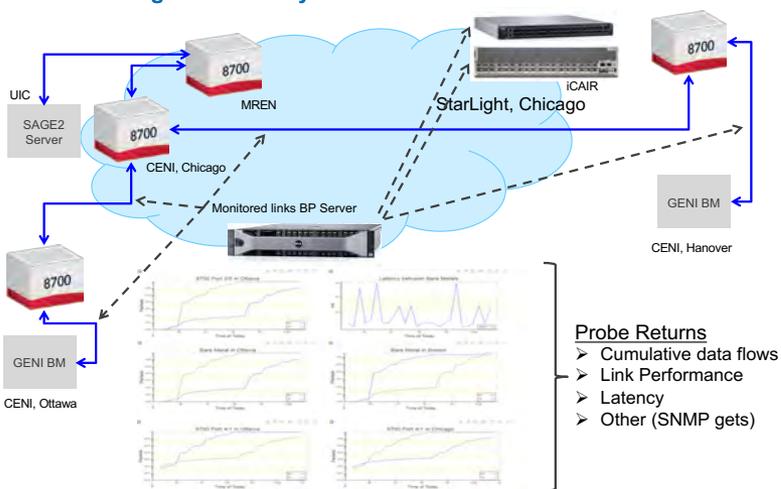

# SC16 Ciena/Northwestern/EVL Demo

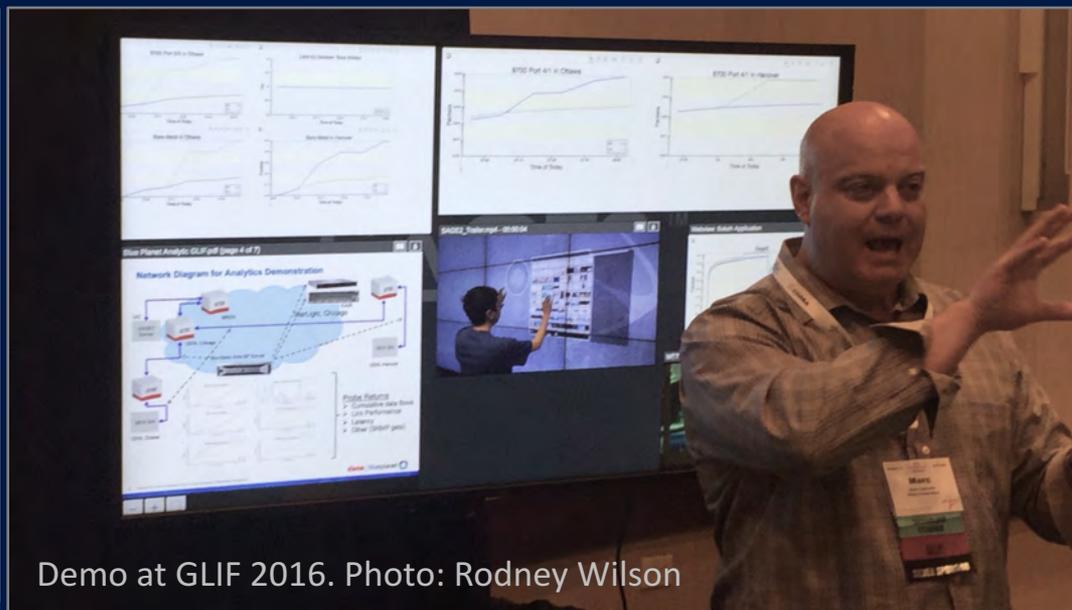

Demo Prototyped at GLIF 2016, Miami, in September

- A remote SAGE2 server is set up at University of Illinois at Chicago (UIC)
- A SAGE2 display monitor is set up at SC16
- A SAGE2 browser is used to access and display Ciena's Blue Planet web-based network monitoring charts from a server at Northwestern University, video streams from UIC, and PDFs and videos from a local laptop.

Network Diagram for Analytics Demonstration

# What's New

# SAGE2 V2

WRIGLEY FIELD  
HOME OF  
CHICAGO CUBS  
HOME OF THE  
CHICAGO CUBS

Wrigley

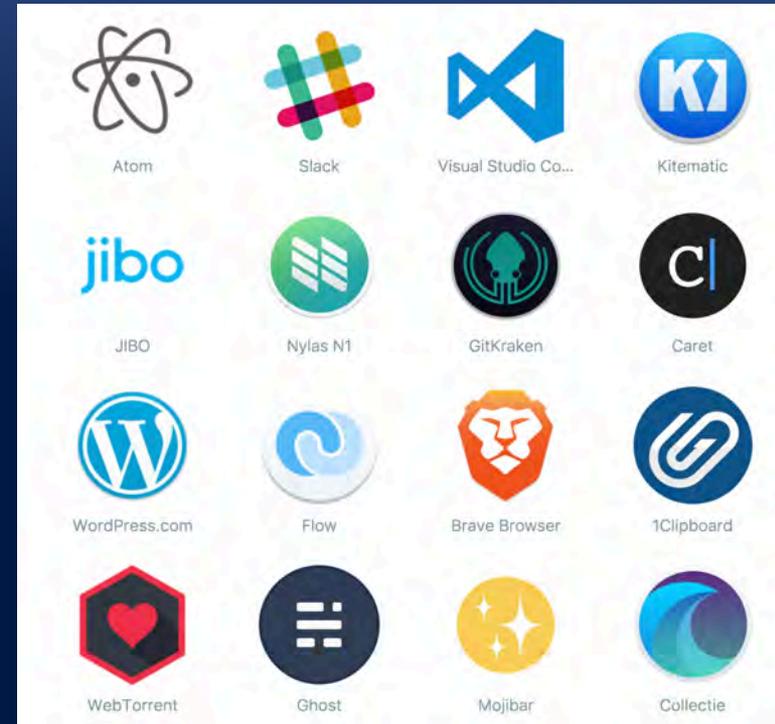

Available Now!

# Electron technology

- Framework to build cross platform desktop apps with web technologies, using JavaScript, HTML, and CSS
- Combining **Chromium** and **Node.js** into a single runtime and apps can be packaged for **Mac, Windows, and Linux**
- Uses the rendering library from Chromium
- maintained by GitHub, open source

# Electron capabilities

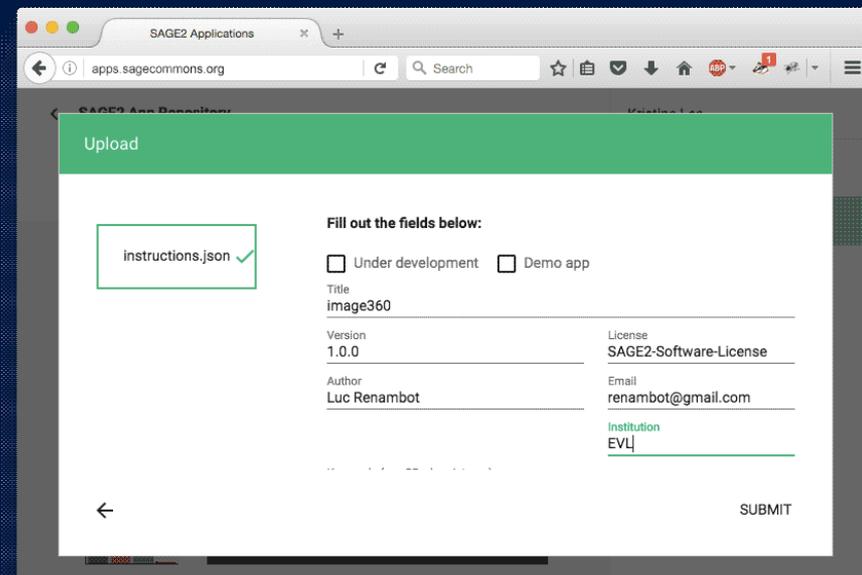

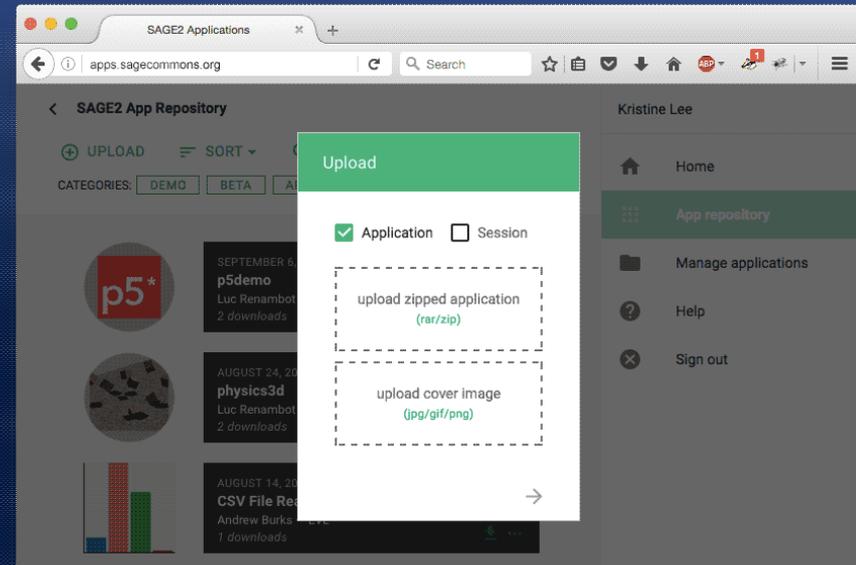

- Webview
  - Can create independent web windows easily
  - Views can be controlled by parent process
- Independent of Chrome installation
  - Packaged in the SAGE2 installer
  - No need for Chrome on the display machines
- Easier to control
  - Window position and size
  - Security

# What the Transition to Electron Enabled

# App Store

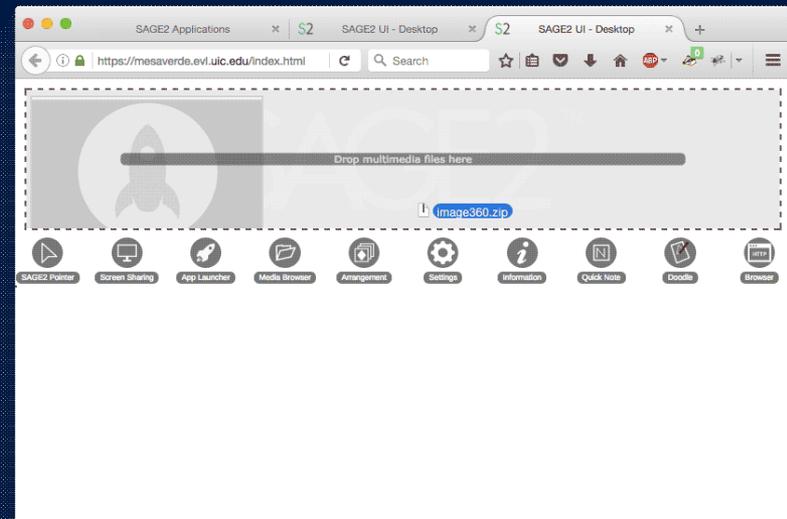

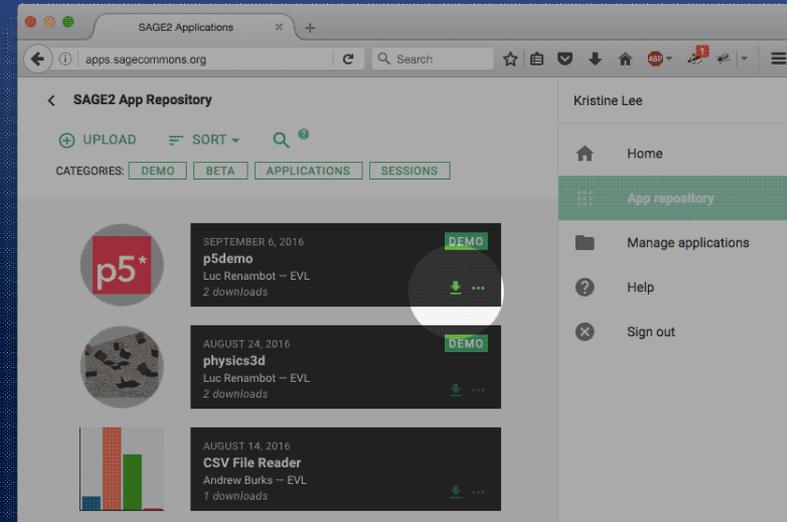

- Place for developers to share applications
- **apps.sagecommons.org**
- Login with Google
  - Open to all
- Zip and drag-drop
  - Manage your apps
- Monetization ?

# App Store

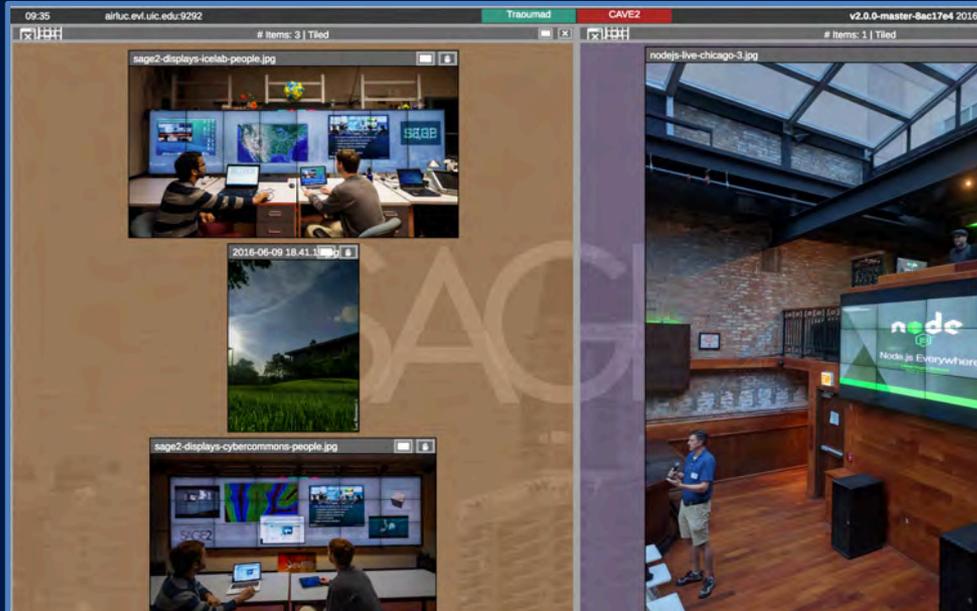

- Easy to use for end-users
- Search box
  - Keywords
  - Tutorials / Samples
- Click to download
  - Get a zip file
- Drop the zip onto your UI
- Application installed and usable immediately

# Screen Partition

- Move and resize groups of applications, like giant poster boards

# Extended Launcher

- Windows binary helper
  - To help with initial setup and editing of configuration
  - Starts **Electron** for display client and audio manager

The screenshot shows a configuration window with two main sections: "Alternate Hosts" and "Remote Sites".

**Alternate Hosts:** This section is titled "Alternate Hosts" and has a subtitle "Any alternate hostname or IP address to access the server." It contains two text input fields with the values "127.0.0.1" and "localhost". Below these fields is a blue button labeled "Add Alternate Host".

**Remote Sites:** This section is titled "Remote Sites" and has a subtitle "Any remote site which this should connect to." It contains two sets of fields for "Remote Site 1" and "Remote Site 2".

Field	Remote Site 1	Remote Site 2
Name of Remote Site	Pele	CAVE2
Hostname of Remote Site	pele.manoa.hawaii.edu	lyra.evl.uic.edu
Port of Remote Site	443	443

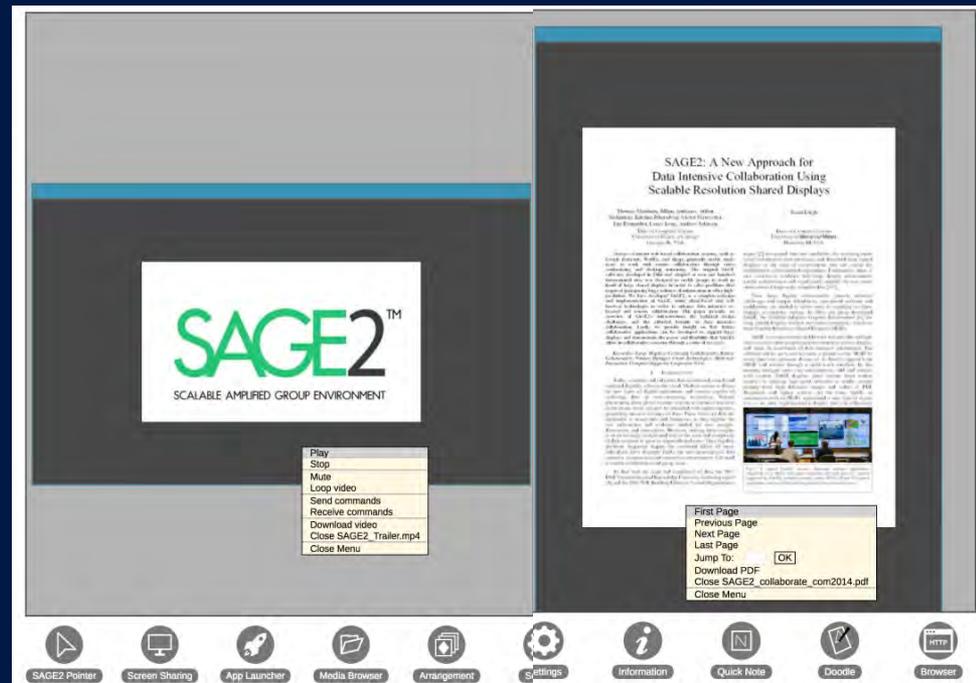

Below the Remote Site 2 fields is a blue button labeled "Add Remote Site".

At the bottom of the window, there is a message: "Saving will overwrite -> \Documents\SAGE2\_Media\config\default-ctg.json and electron-ctg.json". Below this message are three large blue buttons: "Save", "Save And Make Certificates", and "Cancel". A small warning message is visible below the "Save And Make Certificates" button: "Certificates will be made for host and each alternate host specified. Overwriting may occur. If you bought from a CA take caution when using this."

# Application Interface

- UI right-click context menu
  - app interaction without starting the pointer
- Basic key controls
  - Arrows for PDF
  - ‘p’ play movie
- Download the content directly from the wall

# Automatic UI Scaling

- Resizing of the UI widgets based on screen size, resolution and user distance
  - Basic
    - Screen diagonal distance, aspect ratio, and resolution
  - Advanced
    - Screen width/height, border thickness, and resolution
- Leverages screen size and resolution to optimize UI space and readability relative to typical user distance from screen

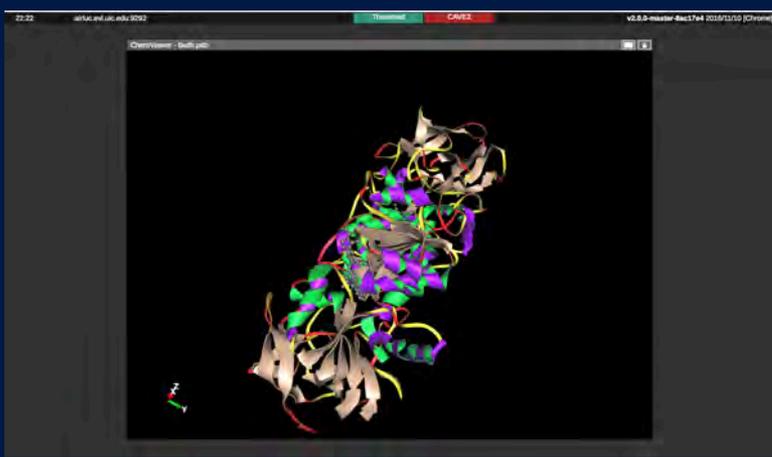

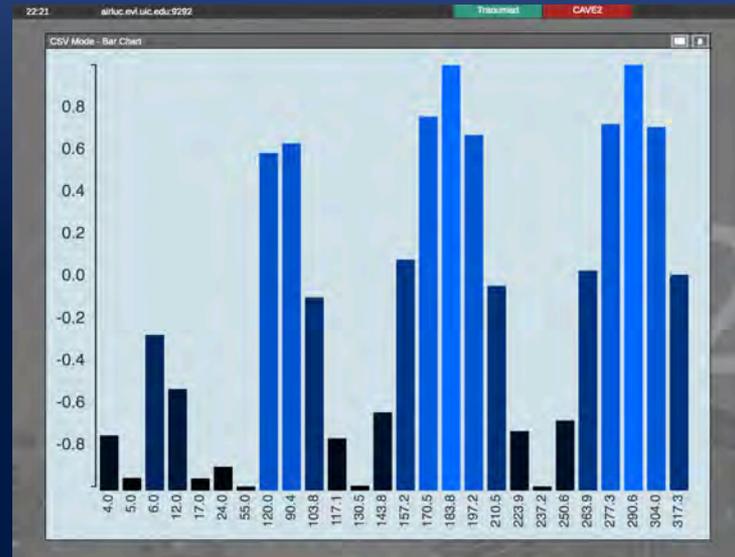

# Mouse/Keyboard events

- SAGE2 pointer to mouse event conversion
- Reduce requirement of converting webpage to SAGE2 app
  - Use existing event handlers
- Automatic translation from SAGE2 to the web browser
- Works well for D3.js

# New Applications

- CSV viewer
- ChemViewer
- PDF viewer
- Doodle and quick notes

SAGE2 Central Interface

SAGE2: A New Approach for Data Intensive Collaboration Using Scalable Resilient Shared Displays

Column 1	Column 2	Column 3	Column 4	Column 5
...	...	...	...	...

# Documentation

- Installation
- SAGE2 UI walkthrough
- SAGE2 API
- Screencast and how-to videos
  - Youtube channel
  - <https://www.youtube.com/channel/UCQs-iwHHGqg3xNHR6dDDi3A/>

# Upgrade

- Download and unpack
  - how to upgrade
    - V1.0 to V2.0
    - copy the SSL/HTTPS keys
  - Windows non-cluster
    - Defaults to Electron for display
    - Chrome: legacy mode (without webview)
  - Linux & Mac
    - Instructions
    - Docker image

# Beta Features

- Movie player
  - Synchronized group of movies
- Services
  - Image processing
    - Pyramidal processing and hosting
  - Video processing
    - MP4: 4K, HD, 720p
- Container
  - Docker
  - SAGE2 server on demand
- Jupyter integration
- ParaSAGE
- Linked visualizations

# Future

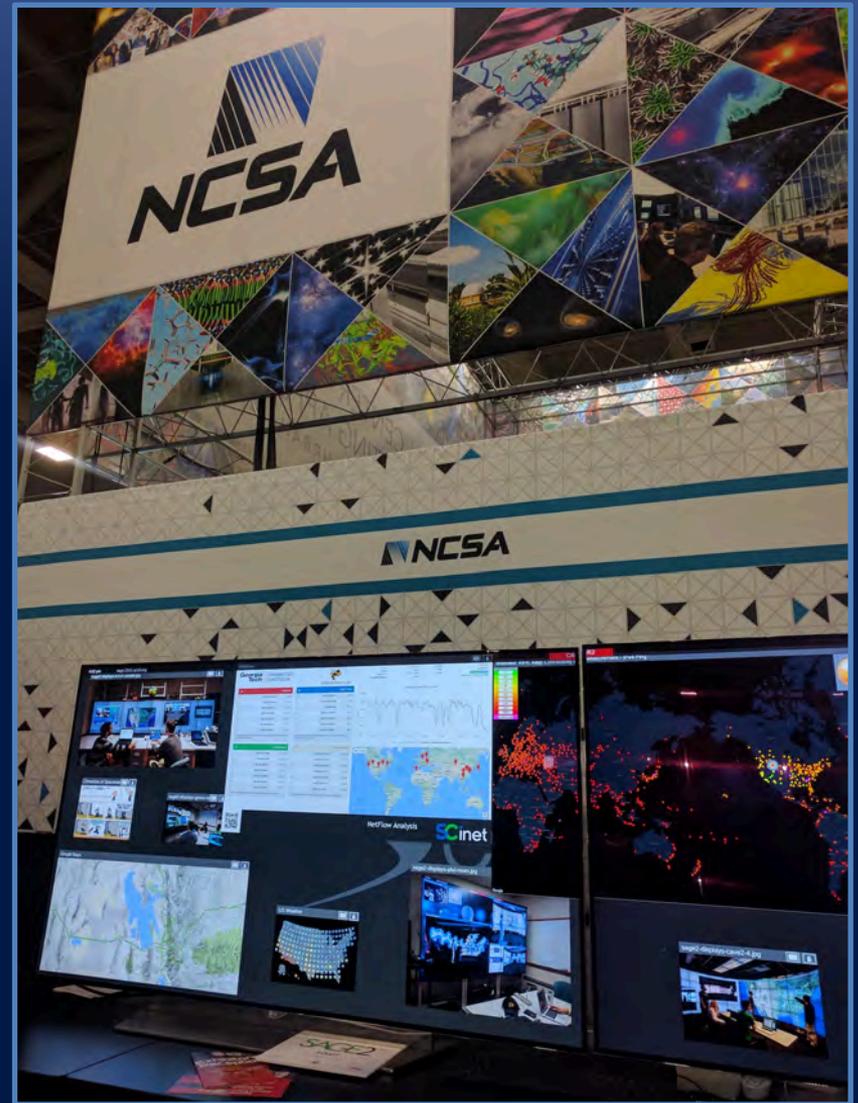

- Inter-application communication
  - Group behavior
    - Play/pause several movies
  - Inter application messaging
    - Shared variables
  - Parent-child relationship
    - Hierarchy and multiple views
- SDN communication
  - Discovery, allocation, reservation of network resources for collaboration
- Portable sessions
  - Sharing sessions between sites
  - Uploadable to the app store

# From the community

- Share your application via the app store
- Share your use cases and lessons learned
- Share pictures of your SAGE2 displays
